EXPERIENCE

Course Web Developer

"No formal work experience, but with practical knowledge in various modern technologies, acquired through individual and collaborative projects. I have worked with both frontend and backend tools, including Node.js, React, PHP, Tailwind CSS, JavaScript, Python, and C, among others. Additionally, I am constantly learning, exploring new technologies and methodologies that interest me to improve my skills as a Full Stack developer."

Acelat E-commerce Agency

I worked for a year as the sole full-stack programmer, using the Amazon Ads API, and working with technologies such as Node.js, Python, React.js, and various libraries for the field, also having full participation in the creation of the database and deployment of different websites using the aforementioned technologies

COURSES MASTERCLASS

Full stack programming

This course is aimed at making you skilled in both the front-end and the backend, managing both fields with ease in the area.

Front-end management

Good use of tools for the visual part in frameworks such as: React and Vue.js and libraries such as bootstrap and tailwindcss

Back-end management

Good management of the backend using tools like Node.js, Express.js, PHP and learning a little Python. Also with good database management in relational and non-relational databases such as Mysql and MongoDB
